Man Dies Suddenly in Mossleigh Hotel

Stricken With Heart Attack While Waiting for a Bus

While waiting for the Sunshine Bus at the Mossleigh Hotel Tuesday evening, Jas. H. Jordan, formerly of the Queens-town district, collapsed suddenly in a chair. Dr. E. J. Liesmer, coroner, was called and after viewing the body decided an inquest was unnecessary, death having resulted from a sudden heart attack.

W.A. Meets at Home of Mrs. P. H. Coleman

The monthly meeting of the W.A. was held on Thursday, April 9th, at the home of Mrs. P. H. Coleman. Mrs. Hesketh assisting. Mrs. G. Jones conducted devotionals. Reports from the Visiting and Sunshine Committees showed work was being accomplished and the Sunshine Committee was empowered to use funds to help some needy cases in the community. A request was read from the Missionary Society of the United Church for used clothing. Any donations for this will be received by Mrs. Bishop. Report of the spring sale added \$49.70 to the treasury. The W.A. are grateful to Mr. and Mrs. Board for the use of their store for the sale. The social evening at Mrs. G. Leith's netted \$7.76. Messadams Clifgard, Coleman and Fonger were appointed to take care of the business details for the play which the W.A. are sponsoring some time in May. The committee for Amateur Night suggested this would make an interesting program for early fall and was endorsed by the W.A. Mrs. Kemper gave an interesting book review portrait of an American mother by Pearl Buck. The travelling shirt was "unpatched" and added \$10.42 to W.A. funds. Tea was served by the hostesses to 12 members and 4 visitors.

The Rocky Mountains Call

Two of the most democratic societies in the world, whose membership includes a former king and queen, famous statesmen, and common folk, all on an equal footing, are the Sky-Line Trail Hikers and Trail Riders of the Canadian Rockies, whose annual outings this year promise something new in the way of scenery and energetic healthy recreation.

The Trail Riders, whose five-day trip starts from the Banff Springs Hotel on July 21, will tour a section of the Park which was chosen by Major P. J. Jennings, superintendent of Banff National Park, for the interesting variety it offers. The centre of activities for the Sky-Line Trail hikers, from August 7 to 10, will

be Lake O'Hara, probably the most beautiful spot in the Rockies. In both cases there is splendid fishing in swift-running mountain streams, and unlimited opportunities for the camera enthusiast.

The Trail Ride actually begins about four miles from Banff, winds its way between Mount Baldy and Mount Norquay, follows Portmole Creek east of the Sawback Range, passes over Indian Pass, follows Johnston Creek down to the end of the spectacular canyon of the same name, and ends up near the highway where there is an ideal spot for the Pow Wow and Sing-Song that concludes every Trail-Ride outing. It provides five care-free

days with fine open Alpine meadows, high passes, good timber, and lakes and streams of great beauty.

Plans for the Sky-Line Trail hike make provision for one central camp at Lake O'Hara. This will avoid changing camp every night as has been done in the past and will reduce the cost of the outing considerably. From Lake O'Hara the hikers will make forays of adventure over the Rose Lake trail to Lake Louise; through the Naros Lake district; along spectacular Cataract Creek to the limpid beauty of Lake McArthur; and along the McArthur creek trail; and southeast through the valleys of Forty Mounts, Yakkas, Hapabee, and Wenchemma.

U.F.W.A. Notes

The postponed meeting of the U.F.W.A. was held at the home of Mr. and Mrs. G. Forest Kemper, with Mrs. W. H. Ellis and Mrs. M. H. Ward as assistant hostesses. Various flower and vegetable seeds were packaged. Proceeds from the sale of seeds will be used to further the work of the Sunshine Committee. Mrs. DeWitt, Convener of Beautification and Horticulture, gave a talk on

Planning the Flower Garden and stressed the necessity for a shelter belt.

An interesting discussion on suitable reading for different ages took place during the tea hour.

The next meeting will be held at the home of Mr. and Mrs. J. McEae, Shoultice. All convales are asked to give reports at that time.

Topics assigned are "World Servers" and the "Next Three Years" by Mr. M. H. Ward. This talk will be followed by a general discussion led by Mrs. Richards, convener of Peace.

The regular meeting was held at the home of Mrs. McEae on Wednesday April 15. A large number of members and visitors responded to roll call. The Book Review "Clearing in the West" was read by Mrs. C. Journey.

Conveners gave reports of their work. The bulletin prepared by Mrs. Strong of Peace River was read by Mrs. DeWitt.

Mrs. Ward introduced the subject of "World Servers" by giving excerpts from "The next three years" by Alice M. Bailey. Tea was served by the hostesses assisted by Mrs. McBride and Mrs. House.

A delightful feature of the meeting was a birthday party in honor of Elaine Swindon and Max Ish. Thirty-one children attended the party and were grateful to the hostesses of the day for their work in preparing the birthday cakes and delicious refreshments.

The joint meeting with the men will be held on Friday night of this week at the home of Mr. and Mrs. Pinkerton. Pot luck supper will be served at 6:30 p.m. All interested in U.F.A. and U.F.W.A. work are cordially invited to attend.

BUFFALO HILL NOTES

There will be a dance at the Buffalo School Friday, April 17. A good floor, good music at a popular price.

The roads are drying up fast. Mark DeWitt had the road drag going last Monday, from the McInnes Bridge, across the tracks to the corner north of R. G. Bell's House.

Norman Earl having completed his studies at the Olds Agriculture School, is back home, but at present is unable to renew acquaintances on account of having the mumps.

Violet Earl is visiting at Mrs. Frank Tharley's during the Easter holidays.

The Buffalo School reopened after the Easter holidays on Tuesday.

For Sale—A Sampson Copper Carbonate Smut treater for Wheat, good as new. Can also be used with other powder treatments such as Ceraen, etc. Has pulley for power drive and crank for hand use. Will sell for half price or trade. A. E. Starling.

Barley for Sale—A small quantity of 2 year old Trebri Barley, the big yielding kind, at 55c per bushel. Also small quantity O.A.C. 21 Barley, Certificate No. 54-1785 grown on summer fallow. Price 65c per bushel. Also some old and new oats, Enquire Pot Elevator for particulars. A. E. Starling.

ARROWWOOD ITEMS

The Arrowwood Consolidated School will re-open on Monday, April 20.

Mr. Allan Phillips has been confined to his home with the flu for the past couple of days.

Mr. and Mrs. Sawyer and family of Glenview were Sunday visitors in Arrowwood.

Miss Mary Fisher and Miss Vera Hesketh are spending the holidays at Okotoks.

Born—On Friday, April 10, to Mr. and Mrs. G. Loughran of Milo, a son.

Mr. H. McCullough is spending the Easter vacation with his parents at Aldersyde.

FOR SALE—Seed Oats and Feed Oats. Phone Federal Grain, Arrowwood.

Mr. Malcolm Taylor is attending the teachers convention in Calgary this week.

NOTICE—Poison for the Marquis Municipality will be distributed by E. E. Jacques, Druggist, in Arrowwood.

The many friends of Mrs. F. E. Bell will be glad to hear she is improving daily since her recent illness.

Mr. and Mrs. A. N. Thorsen returned last week from the Western States where they spent the winter.

Mr. W.S. Benjamin left last Thursday for Brooks where he will visit relatives for a week or two.

K. R. McLean, R.O., Optometrist and Sight Specialist, will be in Jacques' Drug Store, Arrowwood, on Monday afternoon April 20th.

Larsen Implements capably demonstrated the possibilities of the pneumatic tired tractor while dragging the streets on Saturday.

Miss Alma Vonneseand is spending the Easter holidays with her parents in Milo. She was accompanied by Miss Patricia Coleman.

Owing to the impossibility of the roads throughout the district, Dr. Liesmer had to make use the C.P.R. speeder when called to Milo one day last week.

SPECIAL for the month of April 1 year subscription to McLean's Magazine—75c. 2 yrs for \$1.25. 3 years—\$2.00. See E. E. Jacques, Your Druggist and Stationer.

Don Bowman and Bill Alstott nearly broke a speed record in coming from Tonasket, Wash., to Arrowwood, a distance of 655 miles, in 11 1/2 hours last Friday. Don intends to spend the summer in Arrowwood with his parents, while Bill continued his journey to Glenview where he will visit his brother, Mr. Geo. Alstott.

Gleichen's Stampede Tuesday, June 23rd

The Gleichen Stampede Association will for the second time stage the Gleichen Big Round-up on June 23rd. Plans are already underway and the assurance is that this will be the biggest and best yet. Gleichen has been allotted the privilege of holding the eastern district championship. This zone covering: Hussar, Drumheller, Chertmore Lake, Redcliff, Alsaak, Gem Dorothy, Hand Hills, Carbon and Oyen. The events of the day will be as follows: big parade, full line of stampede events, good music, pro fight, dance, etc. Cash prizes will be awarded and no percentages.

ARROWWOOD ITEMS

Dr. H. P. Barker, Dentist at Vulcan, was a visitor in Arrowwood on Wednesday.

Mrs. C.G. Taylor left last Thursday for Vancouver on a short visit with relatives.

Mr. M. R. Leonard of Carmanagay spent Sunday in Arrowwood.

The Arrowwood School staff are attending the teachers convention being held in Calgary this week.

Mr. Frank Fogarty of Vancouver is visiting with Mr. and Mrs. P. H. Coleman for a few days.

Mrs. Rainville, who had the misfortune to sprain her ankle, is at present visiting with her daughter, Mrs. G. Leith.

The King's birthday on June 23, when King Edward VIII will be 42 years of age, will be a statutory holiday in Canada when banks and financial institutions will be closed.

Mr. and Mrs. W. C. Lyle returned from Calgary Friday, where they have been spending the winter. Miss Amy Lyle, who is at present in Seattle, will return later.

Mr. and Mrs. E. E. Jacques and family, accompanied by Miss Hazel Taylor and Mrs. H. H. Bishop, returned Monday from Calgary where they spent the week-end.

The results of counting the ballots for the position of agent of the U.E.A. Purchasing Pool No. 2 which took place last Saturday, resulted in Ralph Leonard being appointed to that position.

"Business men of Vulcan were warned this week by the local detachment of R.C.M.P. to be on the lookout for counterfeit \$10 Bank of Canada notes. A photostatic copy of one such bill was shown around so that all might acquaint themselves with the bogus money. The bills in circulation are that of a \$2 bill of Canada raised to a \$10 one. The work of the counterfeiters is clever and deceptive, however careful examination will reveal plenty of errors."—Vulcan Advocate.

Gets a tough, elastic, hard wearing protective film. Waterproof and Weatherproof. Retains gloss under severest outdoor or indoor usage.

We show a variety of attractive shades.

The Century of Science

Research work now being carried on in the laboratories of the world devoted to industrial progress and advancement of scientific knowledge is unlocking vast reservoirs of hitherto hidden facts and data to such an extent that their practical application to man's needs and welfare is bound to profoundly change habits and modes of life and work in the future.

Old and well accepted theories in the realms of astronomy, chemistry, physics, medical science, biology and other fields of science are being shattered almost daily as a result of the work which is being carried on by the silent, be-spectacled men and women in these research workshops and so rapidly are new discoveries being made and converted to the use of mankind that those who predict that the present century will go down in history as an era of scientific achievement are speaking with undampened authority.

In fact, the achievements of the first third of the present century are sufficient in themselves to substantiate the claim for such a name. Even if, for some unknown and unpredictable reason, the work in this field were to be brought to an abrupt halt now.

One does not have to search far to find reasons for this remarkable advance into the sphere of the hitherto unknown and to explain why so much that has remained hidden for centuries is now being revealed in so great abundance.

One of the reasons is the large sums of money which have been made available for the prosecution of such work by wealthy philanthropists. Another is the discovery by commercial organizations that it pays them to devote a percentage of their earnings to the conduct of research work to assist them in unearthing ways and means of improving their products and of reducing the costs of production to enable them to achieve a paramount place in their field or to achieve it. Another is the now well known fact that almost every new discovery, or the search for it, opens the door for another one and so the march of progress goes forward. Thus, the work is not only progressive but cumulative and in more than mathematical ratio, something like rolling up a snowball.

Still another reason is the fact that so frequently, a discovery in one field of endeavor results in the perfection of new equipment which makes it possible to delve deeper into the mysteries of some other scientific realm or some other class of activity.

And these do not exhaust the reasons. There are others referred to recently by Mrs. O. LaRue. Writing in a recent issue of the Christian Science Monitor an article dealing with developments in the arena of natural science this author said:

"Natural science arose partly out of man's desire to conquer nature and partly from his insatiable curiosity. From the earliest times man has never been content to live by bread alone. It had that within it which impelled it to seek out the mysteries of the world around. It is this curiosity which has forced men to make instruments which have enabled him to sweep the recesses of the starry heavens; to delve among the rocks in order to read from them the history of the earth and those who have lived on it in ages past. In his eagerness he has even penetrated into the heart of matter and seen it divide into radiations."

The same writer sheds an interesting sidelight on the effect such work has on the minds of those who make new discoveries, when she says: "Every time he (the research worker) has forced open the locked doors in the Palace of Knowledge, he has become humbler, less certain of his all-time unshakable faith in the 'reality' of those things which his hands could touch and his eyes see."

It is unfortunate that in Canada sufficient recompense is not always given to the men and women who are devoting a lifetime to unlocking the mysteries of science for the benefit of the country and her people; at least, that is too often the case with those who are prosecuting their work under government aegis. As a result, more adequate remuneration sometimes proves too tempting and they are lured away south of the international boundary to the great loss of this country.

When the benefits which accrue to the country as a result of the development of a vast reservoir of knowledge are weighed in the balance against the remuneration these trained experts receive it is not surprising if better offers from elsewhere for their services are sometimes accepted.

Talked Through His Hat

New York Man Had Radio-Equipped Silk Topper

An announcer wearing an "electrically charged" hat, in the form of a radio-equipped silk hat, promenade with the Easter Sunday strollers in New York, describing the fashions and eavesdropping on conversations unknown to those on the sidewalks. The stunt provided a test of a new portable microwave "station." The range of the silk-hat broadcaster is about a quarter of a mile.

The human hair grows at an average rate of five inches a year in temperate climate.

CONSTIPATION STOPPED AT ONCE!

Constipation troubles for months. Nothing seemed to do any good until I tried Fruit-actives. They brought quick and complete relief. Fruit-actives are the only famous Canadian physician. He concentrated entirely on the fruit-actives. The result is a natural remedy scientifically prepared for best results. Comment—An easy-to-swallow tablet. Safe—do not contain harsh purgative or habit-forming drugs. More than a laxative—Fruit-actives have lasting relief. They tend to strengthen all organs of elimination. Their tonic effects help the entire system.

Fruit-actives
Fruit-actives are the only famous Canadian physician.

Going In For Ice Cream

London Is Preparing For Big Sale This Summer

Warm weather ice cream fashions are being determined at the Ice Cream and Dairy exhibition at the Crystal Palace, the London News-Chronicle remarks:

"This summer, it seems, we shall consume at least 50,000,000 gallons of ice cream, so that the rehearsal now in progress is thoroughly justified."

"It will be bought from penny-in-the-slot machines, in special paper bags, in tins of chocolate and in new wafer wafers, while make it look as if you got more for your penny than you actually do."

"And it will be better ice cream. The milk marketing board has arranged for ice cream manufacturers to buy milk at bulk wholesale prices. Milk powder from abroad has been wisely used so far."

"The immense engineering industry that has grown in recent years must, the needs of the big milk distributive concerns should give those now engaged in the milk prices inquiry some idea of where the money goes."

Richly Clad Mummy Found

Is Believed To Be Daughter Of Great Pharaoh Cheops

The sumptuously-clad mummy of a princess of the Fourth Dynasty (3732-3566 B.C.), believed to be the daughter of the great Pharaoh Cheops, who built the second Pyramid, has been discovered by Egyptian archaeologists.

The mummy lay in a limestone sarcophagus, in an undisturbed tomb whose location was not revealed in the announcement of the discovery. Dressed in brilliant raiment, the princess wore a golden diadem, two necklaces of golden beads, anklets and armlets.

A gold-plated copper belt circled her waist and the fingers of her left hand were encased in gold as well, it was said.

Prof. Selim Hassan of Cairo University, directed the excavations which resulted in the discovery. He said the tomb apparently had never been pillaged by marauders, like most monuments of ancient Egypt.

Wahh Discovered America

Landed 300 Years Before Columbus

The legend of the white Indian, and the claim that America was discovered by a Welshman, were revived at Cardiff, Wales, recently during a Welsh book festival, when books relating to the part played by Wales in world history were exhibited.

It was said that the American continent was discovered by Prince Madoc in the twelfth century, 300 years before Columbus. Madoc sailed from North Wales across the Atlantic with a fleet of 13 ships and never returned.

It is reported that he landed near the mouth of the Mississippi and worked his way inland. His men made friends with the Indians, and ultimately formed themselves into a tribe of white Indians.

Broadcast In Eskimo

Bishop Of The Arctic Told To Charges In The North

A bishop's voice rang through the air for thousands of miles on a recent Saturday to carry a greeting in Eskimo to silent-eyed friends who sat before radio sets from the sub-Arctic fringe to Ocho Peninsula. Rev. A. L. Fleming, Bishop of the Arctic, whose Diocese extends across the great expanse of winter twilight, spoke in English and Eskimo to his friends and charges in the north, broadcasting from Ottawa on the Canadian Radio Commission's Northern Mission program.

Likes Exploring Job

Elsworth Hopes To Do More Of It In Antarctic

Lincoln Elsworth, who recently completed an air journey across the Antarctic continent, said he would like to explore the Australian desert by canoe. He had no definite plans, however, for the venture.

Elsworth said in an interview there was a 100-year job of exploring still to be done in the Antarctic and he expected to do some of it. The explorer landed in Los Angeles in March after an absence of almost a year.

John D. Rockefeller says that the first money he ever earned was made by raising turkeys when he was seven years old. His mother gave him curds from the milk to feed them.

Do You Ever Wonder

Whether the "Pain" Remedy You Use is SAFE?

Ask Your Doctor and Find Out

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN."

He will tell you that before the discovery of Aspirin, men "pain" remedies were advised against by physicians as bad for the stomach, and, often, for the heart. Which is good for thought if you seek quick, safe relief.

Scientists rate Aspirin among the safest methods yet discovered for the relief of headaches and the pains of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this:

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company. Limited. Look for the name Bayer in the form of a cross on every tablet.

Remember and Get "ASPIRIN"

New Electric Trains

One Of Longest Electric Trains Will Be Completed Next Summer

Rapid progress with the electrification of the Southern Railway's main line to Portsmouth, Va., makes it likely that the whole scheme, costing nearly \$15,000,000, will be completed by July, 1937.

Some 85 route miles, corresponding to 242 single track miles, are to be converted, and when finished the 74 miles from London to Portsmouth will be one of the longest electric trains in Britain.

The present longest stretch is the London to Exeter, Hastings and Ore section opened last July.

Forty-eight new four-coach motor units, 19 of which will be provided with kitchen-cars, are among the new rolling stock being constructed.

Tourists Will See Things

Perry Sound, Ontario, To Have Totem Pole Traffic Light

The eyes of a moose, alternately blinking red and green from atop a moose totem pole, will help direct tourist traffic through Perry Sound, Ontario, this year. Plans for the totem pole traffic light were planned to the Ontario Good Roads convention by J. M. Daly, Indian agent from Perry Sound. The pole will be a vast affair, facing the highway, and the images carved on it, from top to bottom, will include the moose, a bear, a deer, two geese, a canoe, a tepee, a school house, and a church. The eyes of the moose, co-ordinated with traffic signals, will be the only animated portion.

There are approximately a half million different sorts of living creatures on the earth. About three-fourths of this number are insects.

European red ants attack other species of ants and carry off their workers as slaves.

There are approximately a half million different sorts of living creatures on the earth. About three-fourths of this number are insects.

European red ants attack other species of ants and carry off their workers as slaves.

Trying Old Experiment

New Jersey Doctor To Use Surgical Grafting Principle

Sixteen-year-old John Sealey's hope for artificial restoration of the arms he lost last November under the wheels of a train at Nutley, New Jersey, rested to-day on application of the 60-year-old surgical grafting principle.

A Newark orthopedic surgeon, starting with an operation at Beth Israel Hospital, expects to apply the discovery of an Italian physician, Vanghetti, about 1870, using muscle grafts to connect artificial limbs.

The surgeon, who has asked his name be withheld, has been engaged by the crippled children's committee of the Nutley Elks Lodge. As he described the operation, a flap of the patient's skin is drawn into a tube and inserted under the muscle. This operation will be performed twice on each of the stumps of Sealey's arms.

When the tissues have healed, he said, cineplastic arms would be attached to the flaps. The neck, hands and fingers then would be operated with the flexing of the muscles.

New Device Invented

Artificial Ear Gives Effect Of Sound On Human System

An artificial ear, for the exact measurement of sound, and its effect on the human system, has been invented by an electrical firm at Prague. It is to be used by the Czechoslovak Ministry of Health in its investigations into the noise problem. Previous sound-measuring devices are stated either to have been too subjective, which has led to inaccurate results being obtained and difficulty in calculation, or to have not measured the true effect of various sounds on the delicate mechanism of the human ear. The new device, it is claimed, represents exactly, in an easily measurable form, the way in which sound affects the ear of a living person.

Ships Without Funnels

Prediction Made That Smoke Will Be Discharged Into Sea

Funnelless ocean liners in the near future was a prediction made by John Johnson, chief engineer of the Canadian Pacific Steamships, Ltd., addressing the Institution of Mechanical Engineers at London, England, recently.

Speaking on the future of steam propulsion, Mr. Johnson said that smoke and gases from the furnaces would be used until they were almost cold, the heat extracted from them being put to use for work.

The gases would then be washed with sea water, and when clean, they would be discharged into the sea just above the water level.

His Only Worry

The doctors had great difficulty in getting a negro soldier, who had been badly wounded by shell-fire, to take an anesthetic. He seemed worried about something, and urged them to get to work without an anesthetic, as he wanted to watch them.

At last they got him to take the chloroform, and all went well until the operation was over.

The stitching was just being begun when he jerked himself back to consciousness and said: "Doctor, don't make a mistake. Don't stitch me with white thread."

Animal Day In China

In observance of Animal Day in China recently not an animal was killed in the country for 24 hours.

All restaurants and shops remained open but not one head of live stock was taken in and cities refused to do away with strays in pounds. The Society for the Prevention of Cruelty to Animals gave open-air dramatic and oratorical messages on kindness to dumb beasts.

A Tough Winter

The big, tough winter of 1935-36 promises to become famous in reminiscence. Grandchildren of 1950 may hear of it as the year of the big cold.

"Shucks Sonny, you don't call this cold do you? You should have been around in 1936. Fetch Grandpa that book of newspaper clippings."

"It got as cold as 68 degrees below zero at Big River in Feb. '36, when the mercury dropped 20 degrees in an hour. At Blaine Lake the minimum temperature didn't get above 20 degrees, below for 37 nights and only one day at noon hit zero for a high."

"Why, they found a rabbit

sitting upright, frozen to death, in a Regina graveyard. Bears in the Calgary Zoo crept into their dens to hibernate for the first time in seven years."

"... Pay attention and quit swinging on Grandpa's beard."

"Some places in the west they had blizzards so blinding that road engineers couldn't find the stations. In the Dakotas the snow froze so hard they used dynamite instead of snow shovels. Ranchers burned their fence posts when the fuel gave out. A minister and his wife stayed alive by burning books. A farmer saved his life by moving in with the cows when he ran out of wood."

"Oil won't freeze, they say,

but it froze in Turner Valley. Pipelines had to be thawed out before the oil would flow to the Calgary refineries."

"... Winter? You kids don't know what winter is. You should've felt the winter of '36."

United Church Notes

Sunday, April 19th. Subject:

"Quo Vadis" or "The Sign of the Cross."

This is a book service. The author, Sienkiewicz, a Polish novelist, wrote the book in 1896. It was immensely popular in England and the U.S. It has also been dramatized with success. The story is a romance and portrays vividly life in Rome in the days of the emperor Nero and the treatment meted out to Christians who by that time, about A.D. 62, had become sufficiently numerous and influential to cause the Roman authorities to take measures to suppress them and prohibit them from teaching their religion or even professing it. The Christians became the objects of the most bitter persecution as the story shows.

Whether you have read the book or not you will enjoy hearing the story. Be sure and don't miss it.

Here and There

Barnwell, Alta., sets this year's record for the first official report on work on the land, according to a message received March 31 by the Agricultural Department of the Canadian Pacific Railway at Winnipeg. The earliest last year was from Taber, Alta., which has held the record for five years, on March 21.

Alfred S. McKay, recently elected president of the Southern Alberta Pioneers and Old-Timers Association, is one of the two surviving members of the survey party which charted the route of the Canadian Pacific Railway across prairies and mountains in 1880-1885.

Interviewed at Victoria recently, W. M. Neal, vice-president of western lines, Canadian Pacific Railway, stated that he anticipated one of the biggest travel years in recent Canadian history. There had been, he said, a substantial improvement in passenger travel business last year which is expected to continue this year.

Changes in hotel management in western Canada are announced by H. F. Mathews, general manager Canadian Pacific Hotel system as follows:—T. E. Chester, manager Hotel Vancouver, appointed assistant general manager of the company's hotels in western Canada, succeeding A. E. Robertson, resigned; Colin F. Pratt, manager Palliser Hotel, Calgary, becomes manager Hotel Vancouver with W. J. Mott, succeeding Mr. Pratt as manager of the Palliser.

Vancouver Island, known as the historical cradle of the Pacific Northwest, is to be featured this summer by a special cruise of the Princess Stora, of the Canadian Pacific B.C. service, which will make a complete circuit of the island, leaving Vancouver at 2 p.m., July 11, for a seven day trip in the paths of the early explorers.

During the winter season just closed, there was witnessed the greatest step forward in ski-lid travel ever recorded. Over 51,000 more than a fifth greater than last year, made journeys over the week-end from Montreal to ski territory in the Laurentians, the mountain paradise to the north of Montreal completely covered by Canadian Pacific Railway. Many came from cities in the Eastern United States to enjoy the sport.

Nine weeks have been named and arranged for Vancouver's Golden Jubilee celebrations proper this summer but the festivities will cover the whole season and are expected to attract visitors from all over the world. One of the high lights will be the re-enactment of the arrival of the first Canadian Pacific train half a century ago.

Thirteen short European cruises from British ports will be made between May and October by the Canadian Pacific liners Montrose and Montserrat this year. The Baltic and the Mediterranean will be covered extensively in these voyages.

Dr. A. H. Compton, physics research expert, recently returned from a trip to Honolulu on the S. Aorangi, after studying attentiveness of the cosmic ray in the southern hemisphere. A specially constructed house on the liner's sun-bridge contained the delicate apparatus for the purpose of securing more data on the little-known but ever present ray during the ship's Antipodean trip.
